HS code	3802.10
Minimum order	Confirmed with quote
Price basis	kg
Supplied by	SriLankaExport.com, Harker International (Pvt) Limited
Country of origin	Sri Lanka
Issued	12 October 2026

Overview

Granular activated carbon made from Sri Lankan coconut shell, packed for aquarium and pond keepers. Sri Lanka is one of the largest producers of coconut shell activated carbon, which is valued for its hardness and fine pore structure. Our bulk carbon listings serve water treatment and industry; this listing is the same material in small, ready-to-use packs.

Packs

- Pre-filled mesh bags that go straight into a filter
- Tubs and resealable pouches
- Bulk carbon for brands that pack it themselves

Grade

Aquarium carbon is usually a mid-size granule that is washed to reduce fine dust. Tell us the mesh size and the iodine number you want, or send the specification of the product you sell now. Each lot comes with its test results.

Claims

Aquarium keepers use activated carbon in filters to remove discolouration and odour from water. We supply the carbon and its lot data; we do not make performance or certification claims (such as NSF) for it, and any claims on your label are yours to support.

Private label

Retail packs can carry your brand. Send us your artwork, pack size and labelling requirements for your market, and we confirm packing options, minimum order and lead time with the quote. You remain responsible for the label claims made in your market.

What to tell us for a quote

- The product, grade or specification you need, and a reference sample if you have one
- Quantity per order and how often you buy
- Pack size, packaging and labelling
- Destination port and the Incoterm you prefer
- Documents your market requires, such as a certificate of origin, phytosanitary certificate or lab test

Packing and shipping

Orders are packed to your instruction and shipped by sea in a full or shared container, or by air for samples and small lots, quoted FOB Colombo, CFR or CIF to your port. Products from several Sri Lankan suppliers can share one container through our consolidation service.

How to get a price: tell us the quantity, your specification and your destination port. We quote FOB Colombo, CFR or CIF, with lead time and minimum order, and arrange samples before an order.

Typical specification

Shelf life	Indefinite if kept sealed and dry
Moisture	≤ 5% as packed
Appearance & organoleptic	Black granules or powder per grade; iodine number ≥ 950 mg/g; ash ≤ 4%; hardness ≥ 95% (granular grades); pH 9 to 11; mesh size per order (ASTM D4607, D2862)
Ingredients	100% steam-activated coconut shell carbon
Storage & handling	Sealed bags, dry, away from solvents and volatile chemicals, which it adsorbs

Typical specification for this grade, not a test result for the lot you will receive. We agree the final specification with your order and supply a certificate of analysis for your lot on request.

Issued by our Trade Desk in Colombo on the date shown. Figures are indicative, not a firm offer. For a firm price against your quantity, destination and Incoterm, request a quote and we reply with a costed position.
