Price basis	piece
Supplied by	SriLankaExport.com, Harker International (Pvt) Limited
Country of origin	Sri Lanka
Issued	12 October 2026

Overview

A coconut shell half makes a natural, reusable candle container, and every shell is slightly different. Sri Lankan makers cut, clean and polish the shells, and the candle is poured into the shell with a wick.

Options

- Filled candles in soy wax or coconut wax blends
- Fragrance to your choice, or unscented
- Empty polished shells for candle makers who pour their own

Standing the shell

A round shell needs a flat base. Shells are either sanded flat underneath or given a small stand. Tell us which you prefer.

Safety and labelling

Candles sold in the EU and UK must carry safety warnings and, when scented, fragrance allergen labelling under chemical rules. In the US, the ASTM candle standards are the usual reference. Tell us your market and we confirm the labels.

Private label

Retail packs can carry your brand. Send us your artwork, pack size and labelling requirements for your market, and we confirm packing options, minimum order and lead time with the quote. You remain responsible for the label claims made in your market.

What to tell us for a quote

- The product, grade or specification you need, and a reference sample if you have one
- Quantity per order and how often you buy
- Pack size, packaging and labelling
- Destination port and the Incoterm you prefer
- Documents your market requires, such as a certificate of origin, phytosanitary certificate or lab test reports

Packing and shipping

Orders are packed to your instruction and shipped by sea in a full or shared container, or by air for samples

and small lots, quoted FOB Colombo, CFR or CIF to your port. Products from several Sri Lankan suppliers can share one container through our consolidation service.

How to get a price: tell us the quantity, your specification and your destination port. We quote FOB Colombo, CFR or CIF, with lead time and minimum order, and arrange samples before an order.

Typical specification

Appearance & organoleptic	Cleaned and polished natural coconut shell halves, each unique in shape and grain, stable base; wax poured smooth and level with a centred lead-free cotton wick; no cracks through the shell
Ingredients	Coconut shell container; soy wax or coconut wax blend; cotton wick; fragrance to order or unscented
Storage & handling	Cool, dry store below 25 °C away from direct sun and heat

Typical specification for this grade, not a test result for the lot you will receive. We agree the final specification with your order and supply a certificate of analysis for your lot on request.

Issued by our Trade Desk in Colombo on the date shown. Figures are indicative, not a firm offer. For a firm price against your quantity, destination and Incoterm, request a quote and we reply with a costed position.
