HS code	2009.89
Minimum order	Confirmed with quote
Price basis	kg
Supplied by	SriLankaExport.com, Harker International (Pvt) Limited
Country of origin	Sri Lanka
Issued	12 October 2026

Overview

Coconut water concentrate is coconut water with most of the water removed, which cuts freight and storage costs. Beverage makers reconstitute it with water at their own plant to make coconut water drinks, smoothies and blends. Sri Lanka grows coconuts all year, and its coconut processors already supply single-strength coconut water and coconut water powder for export.

Forms

- **Frozen concentrate:** shipped in reefer containers
- **Aseptic concentrate:** sterile-filled bags in drums, shipped without refrigeration

Specification

Concentrate is specified by its Brix (sugar concentration) and the reconstitution ratio. Tell us your target Brix, whether you need it from king coconut or ordinary coconut, and the tests your quality team requires, and we confirm the specification on the sample.

Who buys it

Juice and beverage manufacturers, smoothie and food-service brands, and ingredient distributors.

Other coconut water formats

If you would rather not reconstitute, our catalogue also carries single-strength king coconut water in retail packs and spray-dried coconut water powder. Concentrate suits buyers with their own blending and filling line who want to save on freight and storage.

What to tell us for a quote

- The product, grade or specification you need, and a reference sample if you have one
- Quantity per order and how often you buy
- Pack size, packaging and labelling
- Destination port and the Incoterm you prefer
- Documents your market requires, such as a certificate of origin, phytosanitary certificate or lab test reports

Packing and shipping

Orders are packed to your instruction and shipped by sea in a full or shared container, or by air for samples and small lots, quoted FOB Colombo, CFR or CIF to your port. Products from several Sri Lankan suppliers can share one container through our consolidation service.

How to get a price: tell us the quantity, your specification and your destination port. We quote FOB Colombo, CFR or CIF, with lead time and minimum order, and arrange samples before an order.

Typical specification

Shelf life	Aseptic 12 months unopened; frozen 18 months at $\leq -18\text{ }^{\circ}\text{C}$
Brix / pH	Brix 20 to 60 $^{\circ}\text{Bx}$ to order; pH 4.5 to 5.5; reconstitutes to single strength at about 5 $^{\circ}\text{Bx}$
Microbiological limits	Aseptic: commercially sterile. Frozen: total plate count $\leq 1,000\text{ cfu/ml}$, yeasts and moulds $\leq 100\text{ cfu/ml}$, E. coli absent in 1 ml
Appearance & organoleptic	Clear to slightly cloudy, light yellow, characteristic coconut water taste on reconstitution, no off flavours
Ingredients	100% coconut water concentrate, no added sugar or preservatives
Allergens	Coconut (declared as a tree nut in some markets)
Storage & handling	Aseptic: cool, dry, below 25 $^{\circ}\text{C}$. Frozen: $\leq -18\text{ }^{\circ}\text{C}$ throughout storage and transit

Typical specification for this grade, not a test result for the lot you will receive. We agree the final specification with your order and supply a certificate of analysis for your lot on request.

Issued by our Trade Desk in Colombo on the date shown. Figures are indicative, not a firm offer. For a firm price against your quantity, destination and Incoterm, request a quote and we reply with a costed position.
